Street Market Concept

Wuhan
China

Tian Sheng Street
Jiang'an District

Tian Sheng's Historical Market

This **+200m** long street market with over **100 years** of history is the main one in the region. Attracting **thousands of consumers** every day, this is an **extremely important** place for the local economy. Despite its importance, many **problems** are currently emerging and reported by the population. Everyone will be able to **benefit** from an update to this **already incredible** place.

Sidewalk Usage

The street space usage is overall messy, with many vendors and tents taking up the sidewalks, parking spaces and street.

Garbage Collection

There is a large volume of trash cans scattered around the street and it's endings. Generating an big visual pollution.

Parking Spots

A large amount of street space is wasted with cars, motorbikes and bicycles parking everywhere. Leaving pedestrians in the middle of the street

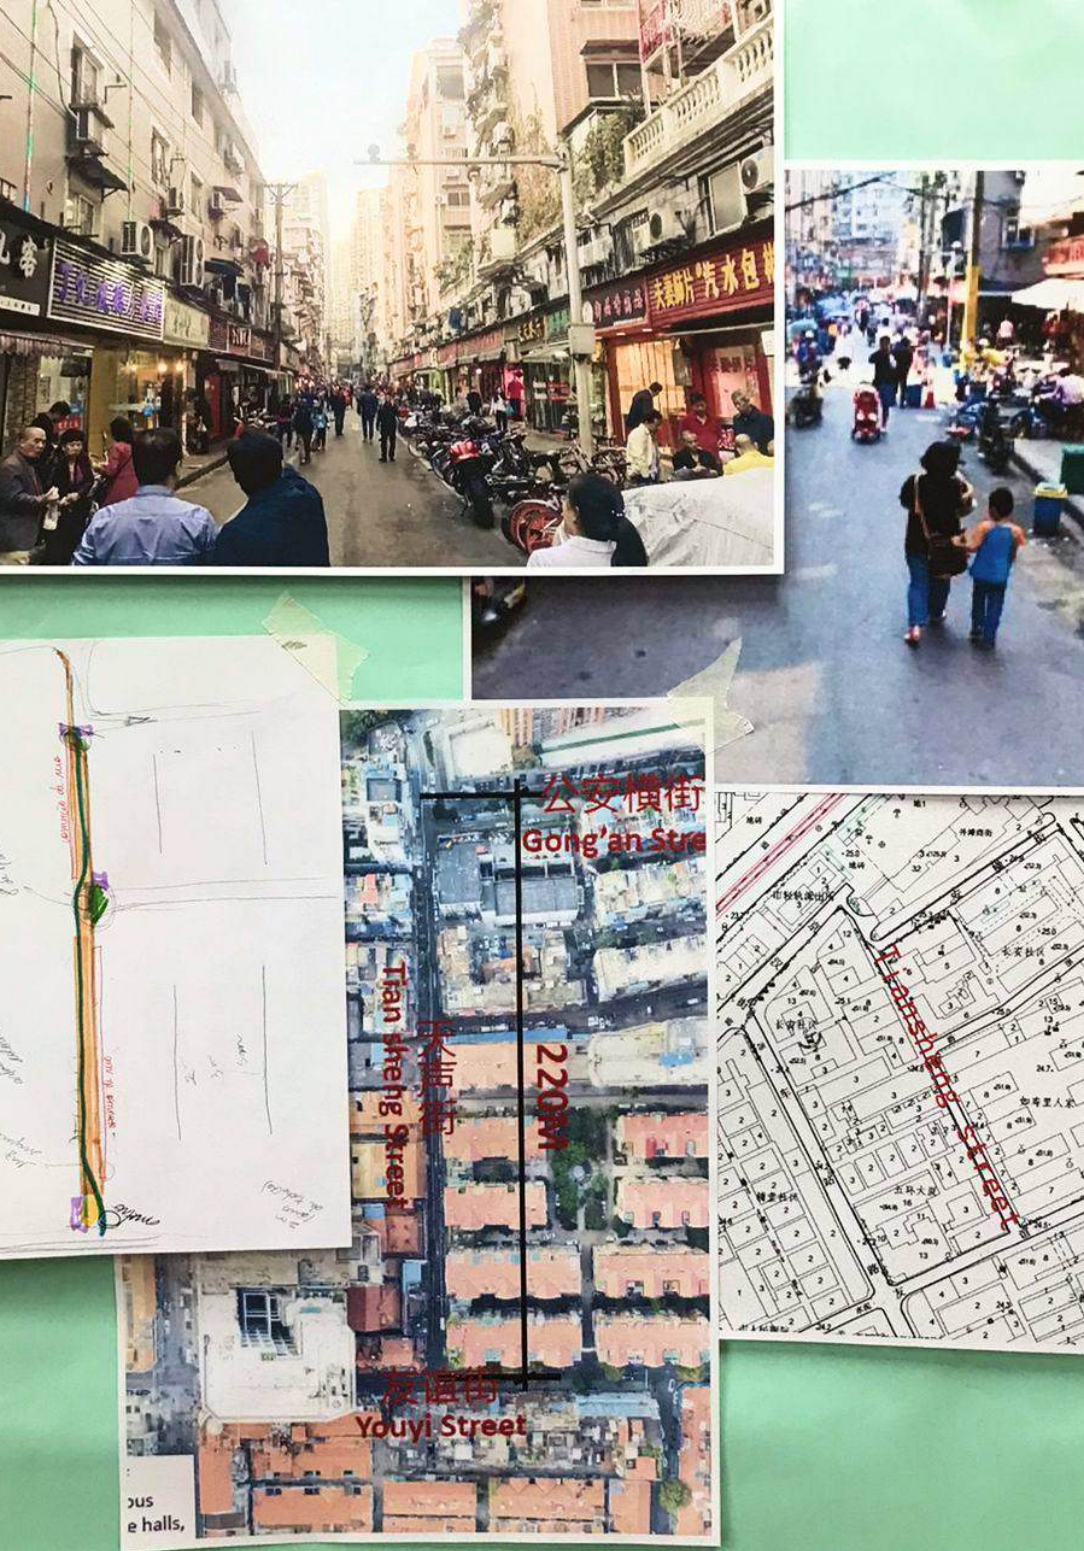

Solution Concept

The name of the project has been taken from the street itself to **enrich the culture** surrounding a **traditional market** that is **already known** by its name.

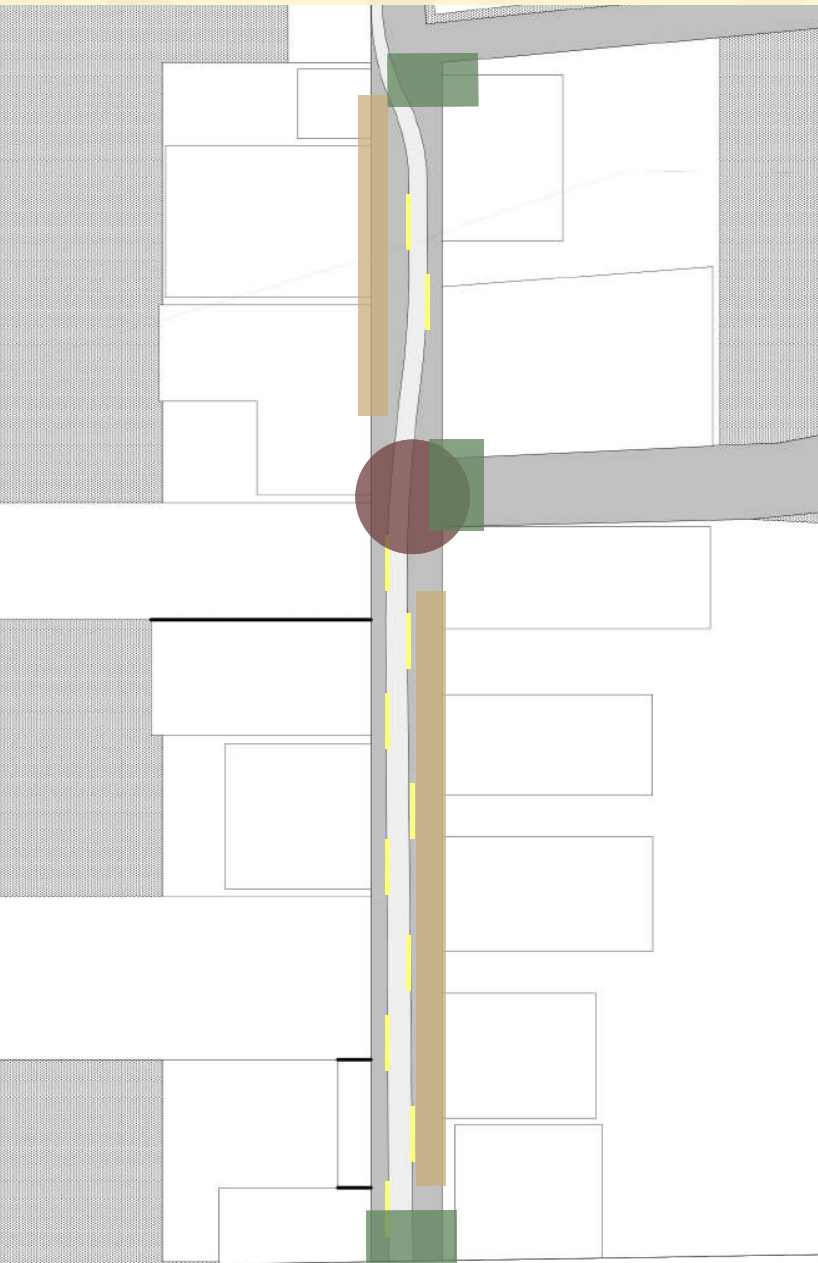

The concept behind the improvements is to **value an ancient custom** and Chinese traditions, innovating with **organization** and more **comfort** for customers and vendors. The street is already great and used by thousands everyday, the goal of this project is **only to improve** and make this daily use **greater**.

Based on **local elements, shapes, materials** and **culture**, the project aims not to be a disturbance, the street is already full of visual elements and noise. **Calm colors** and **simple shapes** aim **not to overwhelm** this crowded view.

Blocking the crossing to cars aims to make **everyone more comfortable** in this space. The street is **kept open** to bicycles, street vendors and emergency vehicles, **guiding them along** a pleasant path that is served by a new series of **urban furniture** around them.

Planning

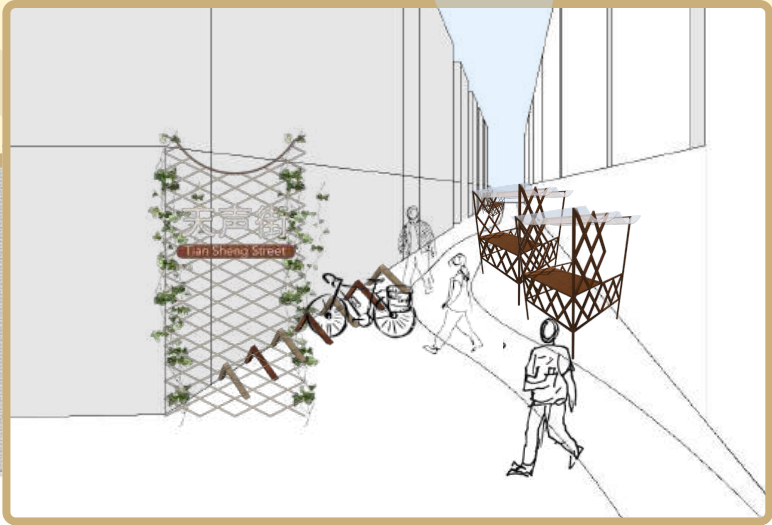

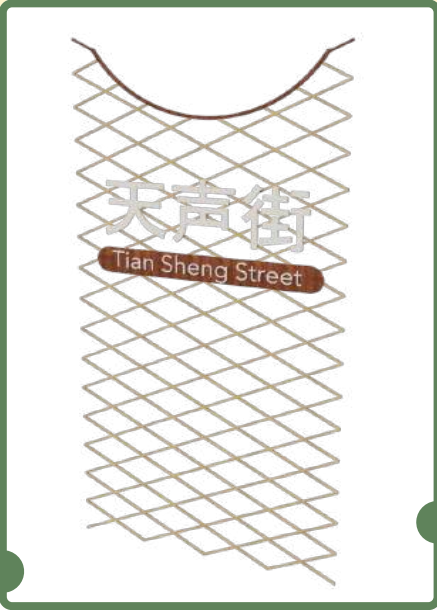

To improve the **flow of people, bikes and service carts**, the street will be on the **same level**, turning it into a **big sidewalk**, making it more **accessible** oriented mostly for people.

To **organize** the spacing, it was made a **pathway** to divide places for the **marketers to expose** the products and/or to prepare the street food that is sold and the people to walk with **different pavements** for the path and for where the **vendor tent** will be. In the night, linear **built-in lights** on the floor will indicate the way for the **pedestrians**.

The **revetment** of the street will be made of **permeable pavement**, in **light colors**, to **reinforce the albedo** and **enhance** the amount of light on the local.

- Multipurpose Tent
- Resting Spot
- Portals, Parking and Trash Bins
- Built-in Flor Lights
- Main Path

Multipurpose Tent

Due to the absence of organization during the daily sales that makes the **passing of people** difficult, we create a **multipurpose vendor tent**, a tent that facilitates the practical of sell and **standardization** in all the street.

The **geometric pattern** used are inspired by **classical Chinese workmanship**, referring to the old culture, very present in the area, and to the unique dynamic of the location.

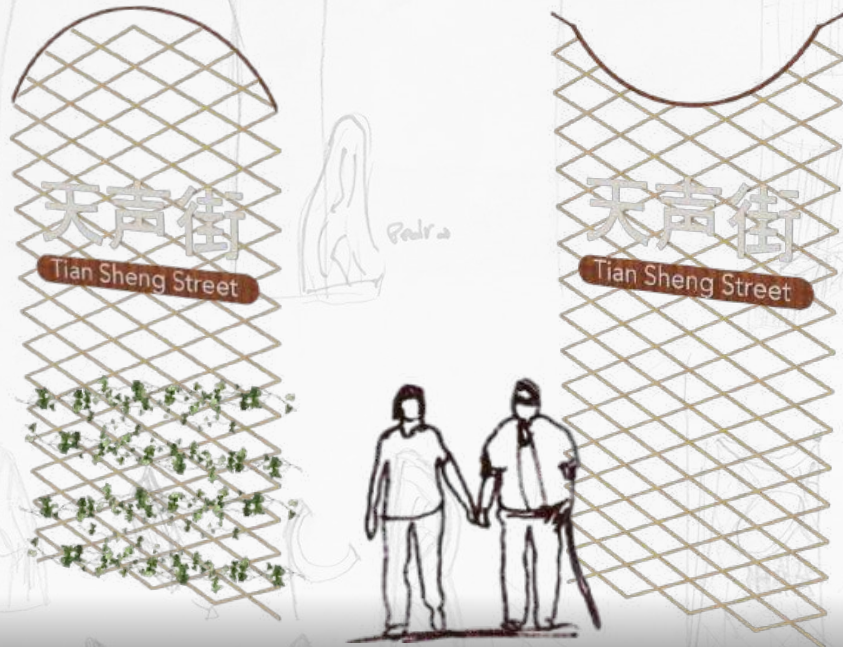

This **series of tents** will fill the street and great a more organized place, each vendor can **use it as it pleases**, making each of them **unique**. All this news tents will great a **better place** for the vendors that don't have a **proper space** at the moment.

All of this will make this **already great** market only **more usable** and **rich in options** to its daily guests. Making the street an even **greater place to visit** and shop around.

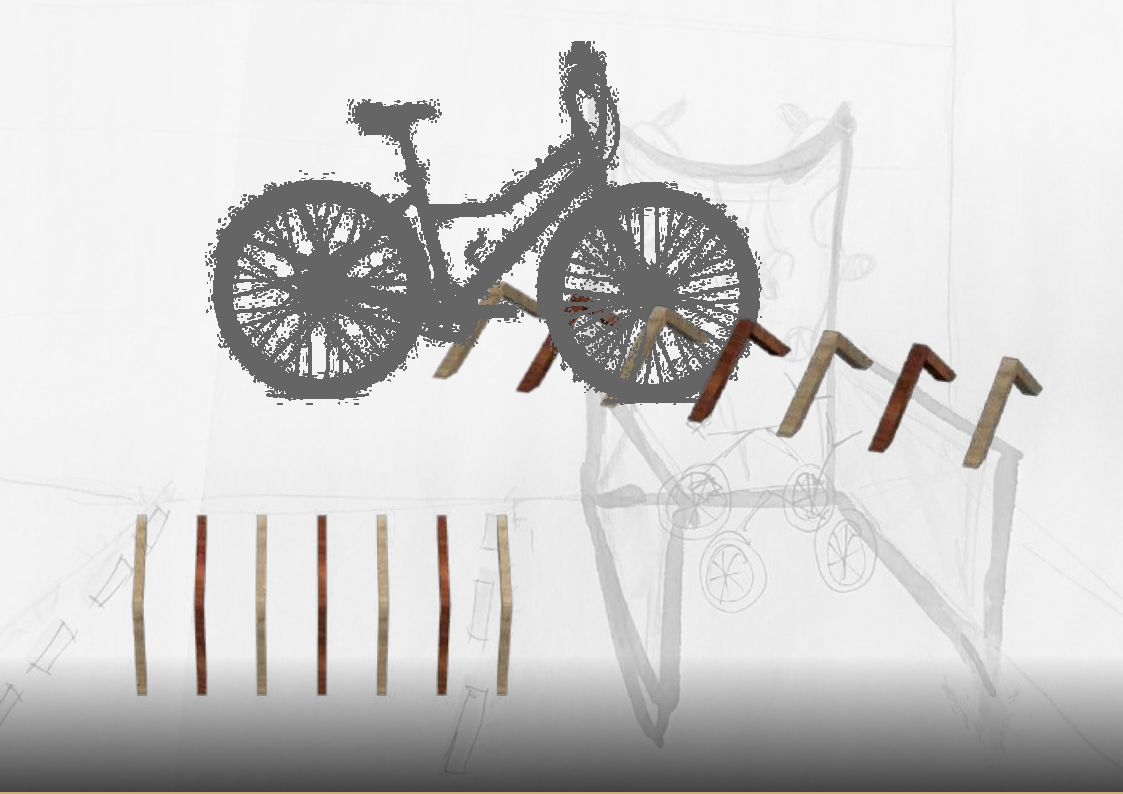

Resting Spot

The **Resting Spot** is made up of a group of **benches** arranged around a beautiful **natural rock**. This central element of the whole project is the perfect place to **rest/eat** during your time on the street for people **passing by**, all **residents** and **street vendors**. The rock brings **nature**, **protects** the pedestrian and calms traffic, a **natural** material contrasting with the **geometrical** seats. Creating a place that encourages a **reflective place** and guides everyone to **walk around** the street.

Wooden Portals

These large wooden gates create **barriers** that create a more **controlled environment**, enhancing the streets wayfinding and the market as a whole. Using **local woods** designed for outdoor use, *Camphor Wood* and *Paulownia Wood*, these pieces **organize** the street entrances without blocking natural light or obstructing the view. Their base is united the planting of a with a **local plant vine**, *Parthenocissus Tricuspidata*, that throughout the years will grow bringing more **nature and life**.

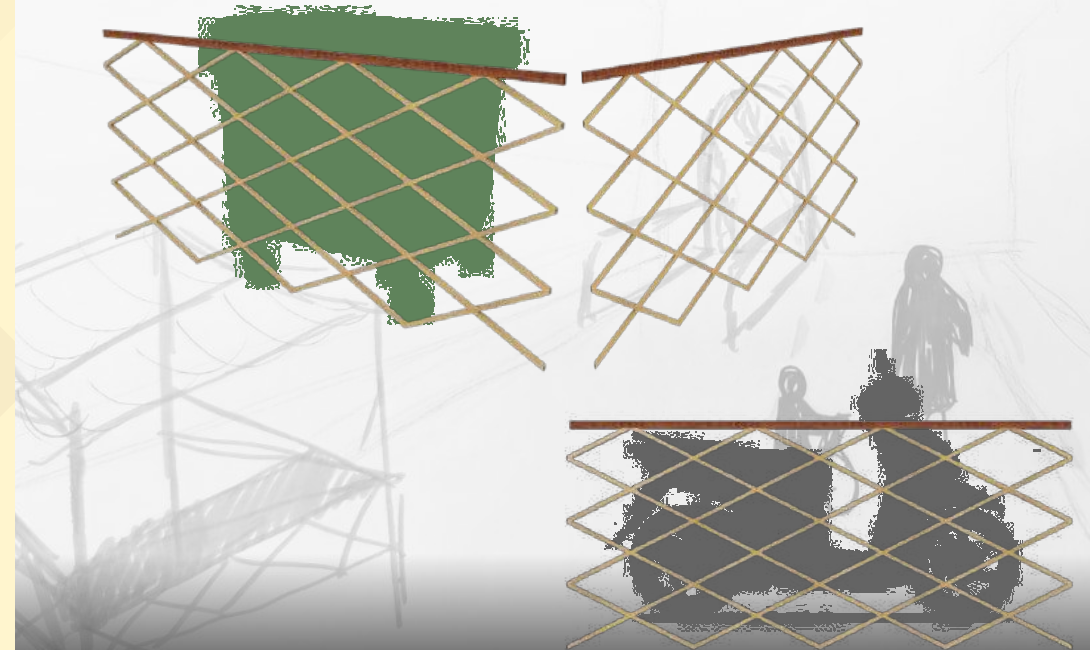

Bike Racks

Small wooden bicycles **scattered around** the street help to organize a more proper and **suitable parking space** for bikes. A space that creates **fewer obstructions** on the people's paths and make the street more **visually clean**.

Wooden Organizers

These wooden dividers create and **organize spaces** for **trash cans** and **motorcycles**. Organizing a more **unique**, proper and **clean** place for these items, leaving the street more **open** and **comfortable** for pedestrians.

Customers

With the insert of unique designed furniture, the street will be more viewed and appreciated by tourists and local costumers.

Nature

The insert of natural elements transmits to the place a psychological well-being and serenity.

Safety

Entering the specific path for vehicles, the pedestrians safety will upgrade, preventing future accidents.
